Research package

Start with `EVALUATION_RESULTS.md` for measured results and limits, `PROJECT_GUIDE.md` for implementation/run commands, and `ANNOTATION_AND_SUBMISSION.md` for remaining research work. `RESEARCH_PAPER.md` is an MTAP-oriented review draft. Every Markdown document has editable Word (`.docx`), legacy Word (`.doc`) and PDF companions. The source professor instructions and CALO PDF are preserved.

Raw measurements are in `evaluation/`; original diagrams are in `figures/`. Private downstream artifacts must be reviewed before sharing. The project is not scientifically validated merely because its functional tests pass. Human annotations, physical phone testing and author declarations remain necessary.
