Local decode → 16 kHz mono
AUDIO / SPEECH
Speaker clusters + pretrained ASR
Timestamped, attributed passages
Native title, body, tables, notes
PRESENTATION / DOCUMENT
Frozen text embeddings or TF-IDF
Real display times only when supplied
ALIGNMENT / LATE SCORE FUSION
Temporal-only | Semantic-only | Combined
Threshold / no-slide sentinel / source IDs
DETERMINISTIC NLP / REVIEW
Events → evidence → candidate decisions → interactions
Weighted contribution estimates, timestamps and history
Python: web/API/history/exports
APPLICATION OUTPUT
Android: native offline analysis
